Error 14: All booking page is not working.....	8
Explanation:	8
Reproduction:	8
Resolution:	8

Error 1: Edit function in HRM

Explanation: The user is unable to edit the employee details in the HRM section of the system.

Reproduction Steps:

- Login to the system and navigate to the HRM section.
- Select an employee and click on the edit button.
- Update any field and click on the save button.
- Check whether the changes are saved or not.

Possible Solution:

The developers need to check the code and identify the root cause of the issue. They may need to debug the code and fix the error to ensure that the edit function is working properly.

Error2: Automatic roles are not assigned to hostess or hotels

No role is assigned to hotel and Hostess I created hostess using hrm create account option and hotel via hotel section

Explanation: The user is unable to assign roles to the hotel and hostess accounts created using the HRM and hotel sections respectively.

Reproduction Steps:

- Login to the system and navigate to the HRM section.
- Create a new hostess account using the "Create Account" option.
- Similarly, navigate to the hotel section and create a new hotel account.
- Check the roles assigned to these accounts.

Possible Solution:

The developers need to modify the code to include a feature that allows users to assign roles to these accounts during the creation process.

Error 3: Female seat lock not available on seat map

No option to reserve for female while making seat map

Explanation: The user is unable to reserve a seat specifically for a female passenger while making a seat map.

Reproduction Steps:

- Login to the system and navigate to the seat map section.
- Try to reserve a seat for a female passenger.
- Check whether there is an option to reserve a seat specifically for female passengers.

Possible Solution:

The developers need to modify the code to include a feature that allows users to reserve a seat specifically for a female passenger.

Error 4: Customer details not saved if directly added to Loyalty card first

I have already added a customer in Loyalty Card but the name is not fetched

Explanation: The system is not fetching the customer name after it has been added to the Loyalty Card section.

Reproduction Steps:

- Login to the system and navigate to the Loyalty Card section.
- Add a customer and check whether the name is fetched or not.

Possible Solution:

The developers need to modify the code to ensure that the customer name is fetched after it has been added to the Loyalty Card section.

Error 5: Seat booking allowed even if out of range

Allowing me to generate a ticket on terminal id which has no rights on that seat i-e seat 13 was not allowed to a terminal id and it booked that even then.

Explanation: The user is able to generate a ticket on a terminal ID that does not have the rights to book a specific seat.

Reproduction Steps:

- Login to the system and navigate to the ticket booking section.
- Try to generate a ticket for a seat that is not allowed for the terminal ID.
- Check whether the ticket is generated or not.

Possible Solution:

The developers need to modify the code to ensure that the system does not allow the generation of tickets for a seat that is not allowed for the terminal ID.

Error 6: Assigning driver or hostess considered as close booking

It displays a close booking button while I assign Driver and hostess to a schedule, however, this is not the case. It can be done without even closing the booking. There is no better way to assign 2 drivers or hostess.

Explanation: The close booking button is displayed while assigning a driver or hostess to a schedule, even though it is not necessary to close the booking for this task. The system does not provide a better way to assign 2 drivers or hostesses.

Reproduction Steps:

- Login to the system and navigate to the schedule section.
- Try to assign a driver or hostess to a schedule.
- Check whether the close booking button is displayed or not.

Possible Solution

Developers need to rename the button to assign the resource and de link it from closing the booking.

Error 7: Backdated booking is allowed.

Explanation:

Users are able to make bookings for dates that have already passed.

Reproduction:

- Attempt to make a booking for a past date.

Resolution:

Implement validation on the booking form to prevent users from booking for dates that have already passed.

Error 8: ELT amount not added in terminal invoice.

Explanation:

The ELT amount is not being added to the terminal invoice.

Reproduction:

- Generate a terminal invoice for a booking that includes an ELT amount.

Resolution:

Update the terminal invoice generation code to include the ELT amount.

Error 9: Schedule can be closed twice.

Explanation:

Users are able to close a schedule more than once.

Reproduction:

- Attempt to close a schedule that has already been closed.

Resolution:

Implement validation on the schedule closing function to prevent users from closing a schedule more than once.

Error 10: Error occurred while merging bus and adding expense.

Explanation:

An error occurred while attempting to merge buses and add an expense.

Reproduction:

- Attempt to merge buses and add an expense.

Resolution:

Review the code that handles merging buses and adding expenses and identify the root cause of the error. Once the cause has been identified, implement a fix to prevent the error from occurring.

Error 11: Users are able to open the ticketing page after closing the booking.

Explanation:

Users are able to access the ticketing page even after a booking has been closed.

Reproduction:

- Close a booking and attempt to access the ticketing page.

Resolution:

Implement validation on the ticketing page to prevent users from accessing it after a booking has been closed.

Error 12: No functionality found to set a timer for automatic cancellation of reserved tickets or manual cancellation.

Explanation:

There is no section in the system that allows users to set a timer for automatic cancellation of reserved tickets or manually cancel a reservation.

Reproduction:

- Attempt to set a timer for automatic cancellation of reserved tickets or manually cancel a reservation.

Resolution:

Implement a section in the system that allows users to set a timer for automatic cancellation of reserved tickets and manually cancel a reservation.

Error 13: “CNIC number is required” error pop up even when entered.

Explanation:

Users are prompted to enter a CNIC number even when it has already been entered.

Reproduction:

- Enter a CNIC number and attempt to search for a booking.

Resolution:

Update the search function to recognize that a CNIC number has been entered and use it to search for a booking.

Error 14: All booking page is not working.

Explanation:

The all booking page is not functioning as intended.

Reproduction:

- Attempt to use the all booking page.

Resolution:

Review the code for the all booking page and identify the root cause of the error. Once the cause has been identified, implement a fix to resolve the issue.

Regards,

Muhammad Shahzaib Aslam,

CEO,

SAR ZONE (SMC-PVT) Limited.
